

A first-of-its-kind arab accelerator in Israel that focuses on science & climtech startups

- Focuses solely on startups in the life sciences and environmental sectors
- Transforms science ideas into groundbreaking ventures by supporting an incredible pool of talents
- Ensures entrepreneurs' peace of mind during the early phases of their business development
- Aimed at STEM students and graduates from Arab societies
- Provides tools, practices, and mentorship for developing life science and climtech technology ideas and ventures
- Follows the Sustainable Development Goals (SDGs) blueprint for Agritech, Agrifood, and Watertech

Helping Entrepreneurs Make an Impact

Starting a life science, environmental, or climate tech company can be a challenging and long-term undertaking. With the ScienTech program, participants receive scientific and business guidance, as well as multiple resources to launch their venture.

Increase inclusion

Support individuals contribute to a stronger & more resourceful Arab society

Working on solutions for the SDG

About Us

The Galilee Society - The Arab Society for Health Research & Services (The GS) is an Israeli non-governmental organization.

Through advocacy, capacity building, and research, GS aims to promote health and environmental justice for Arabs in Israel.

GS has been at the forefront of advancing health rights, leading health forums, providing professional health consultations to Arab communities, improving health literacy, and pioneering health research.
